1. Supersonic Intro

1.1 Supersonic Finance

Supersonic Finance is an early stage DeFi Tech Startup building an ecosystem of cross-chain solutions offering safe, secure and easy to use products for Token Creation, Staking, DeX listing, NFT platforms aimed at meeting the needs of a rapidly growing interest in the DeFi market.

We are developing a sustainable product ecosystem that:

- Eases B2C cross-chain transactions, catering to nascent and long term DeFi enthusiasts, professionals and developers.
- Streamlines entry into the Blockchain industry through ease of use focused applications.
- Prioritizes user privacy and anonymity on the blockchain.

1.2 Mission & Vision

Our mission is to create an all in one ecosystem of highly integrated products which functions to promote, and facilitate the mass adoption of DeFi technology on multi-chain by nascent crypto enthusiasts, developers, and companies through a very simple, easy to use interface.

Our Vision is to become the go-to ecosystem for DeFi enthusiasts and developers for converting crypto assets on-chain, whilst building utility for our native SSN token for it to become a leading standard for multi-chain tokens.

1.2 Supersonic Projects

SaleX <https://salex.app/>

SaleX is a decentralised multi-chain sales platform that will serve as a Launchpad to offer new projects and crypto enthusiasts an avenue to circumvent hassles involved with raising and distributing liquidity through ICOs.

SwapX <https://swapx.app/>

SwapX is a multi-chain decentralized exchange, which services the conversion of crypto assets on-chain. It supports Binance Smart Chain, Ethereum, Polkadot, etc, via the same interface. Anyone, from any country, can use SwapX as it does not involve any KYC process;

anyone can list any crypto asset (native to a supported blockchain), without any form of vetting process.

NFTx

NFTx is a decentralized marketplace built on the blockchain for the sales of digital collectibles. NFTx will add value to the SSN token as it will be used for transactions on the marketplace. Users will be able to buy and sell NFTs ranging from arts, music, to any other item that can be digitized and acceptable on the platform.

xCHART

xCHART is a multi-chain platform which will be used to monitor charts and transaction history across board allowing users to access token history and manage their portfolios. Users can do fundamentals before trading with any coin on SwapX by making use of xChart as all coins listed on the Supersonic Finance decentralized exchange will have available information on the xChart platform.

xBET

xBET is a DeFi sports betting platform accessible to everyone around the world built on the blockchain. Payments will be made using multiple acceptable tokens on the xBET platform and not constrained to one currency like non-blockchain betting platforms. The xBET will offer odds using a smart contract process which will accurately place and update odds offered on the platform.

xLOTTO

xLOTTO is a decentralized lottery platform built on the blockchain which will offer unique rewards for drawn up numbers and figures. The idea is to build a formidable entertainment platform for off-chain blockchain lovers to enjoy a smarter and uncompromising platform integrated with the key features on the blockchain and executed using smart contracts.

2. SSN Token

2.1 SSN Token Analytics

Total Supply and Distribution Analysis as of 26/10/2

| Distribution | % | SSN | Circulation Supply | Locked |
|-----------------------|------|---------------------|---------------------|--------------------|
| Public Issuance | 85.5 | 855,000,000,000,000 | 855,000,000,000,000 | n/a |
| Burned | 8.5 | 85,000,000,000,000 | n/a | 85,000,000,000,000 |
| Technical & Marketing | 5 | 50,000,000,000 | n/a | 50,000,000,000 |
| Team | 1 | 10,000,000,000 | n/a | 10,000,000,000 |
| Total | 100 | 940,060,000,000,000 | 855,000,000,000,000 | 85,060,000,000,000 |

2.2 SSN Utility

Supersonic believes that the value of a token is dependent on how many real word use and purchasing power it has.

With our SSN Token, the goal from inception has always remained about building an ecosystem for mass adoption that would be self-sufficient and rely solely on SSN as a legal tender to write off all debt.

We hold our community responsible for the sustained growth of SSN and trusting us with their investments. We know too well that a token without strategic long term plan, utility and revenue generating back-up plans is bound to fail eventually.

Here's how we intend to avoid that, SSN Utility is created through these key strategies:

- **SSN B2C Products Utility**

As of Q2 2021, the adoption rate of DeFi has gone up 2300% from 889% in Q4 2019, however with these numbers there remain challenges faced with setting up, minting, listing and launching a token have presented an array of problems to the DeFi industry threatening to hinder the growing adoption rate. With our SaleX Launchpad this is very easily resolved

- Up to 99% of transactions on SaleX will be paid for in SSN
- For every user milestone 1% of SSN is burned

- **SSN B2B Products Utility**

With the completion of the SwapX, we will be providing decentralised exchange service to other DeFi tokens, the accepted means of payment is SSN

All products within the ecosystem serve a B2B and B2C use case, albeit some leaning towards one of both target audiences.

2.3 SSN Burn

SSN is the key asset in ensuring the growth of the Supersonic Ecosystem. Comparatively with regular startups focusing on the growth of their equity capital, for us and most DeFi projects, growing the value of our native token in market cap is a point of focus.

The quantity of token in maximum supply and its reduction through burning has a direct impact in the rise in market cap of any given token. We have set a 9.8 Trillion SSN Max Supply.

One may confuse circulating supply with max supply. The primary difference between the max supply and the circulating supply is the max SSN budget that can be used for our ecosystem development. The allocation and usage of these max budget funds is regulated by our core team and Supersonic Auditing Partners annually.

These events have been created to ensure continuous burning of the SSN Max Supply:

- 25% of all Supersonic service revenue from blockchain clients is automatically burned.
- SSN Tokens are burnt for every ecosystem active user milestone.

SSN Burn Address is -

<https://bscscan.com/token/0x89d453108bd94b497bbb4496729cd26f92aba533?a=0x00000000000000000000000000000000dead>

We are always working to create new sustainable burn events to boost SSN scarcity and balance out oversupply.

2.4 Features & Key Info

- **Payment** - Because the goal of Supersonic Finance is to create a massive and self-sustaining ecosystem, liquidity will be copious, facilitating payment and conversion activities centered on SSN.

- **Governance** - SSN is the tool that allows the community to have a say in how the protocol evolves. Several proposals will be submitted to modify the protocol, and because the ecosystem is decentralized and community-driven, any SSN holder will be able to vote on the proposed path.

- **Holdings' Reward** - You earn more SSN tokens directly to your wallet as long as you hold an amount of SSN tokens. The tokens you earn are influenced by the percentage of total SSN tokens being held which can be tracked here.

- **Smart Contract Address -**

<https://bscscan.com/token/0x89d453108bd94b497bbb4496729cd26f92aba533>

3. HyperSonic Token

3.1 HyperSonic Token Analytics

Total Supply and Distribution Analysis as of 27/10/21

| Distribution | % | Hypersonic | Circulation Supply | Locked |
|-----------------------|-----|------------|--------------------|---------|
| Public Issuance | 45 | 450,000 | 450,000 | |
| Private Sale | 5 | 50,000 | 50,000 | |
| Marketing | 10 | 100,000 | | 100,000 |
| Partners & Advisors | 5 | 50,000 | | 50,000 |
| Equity Investors | 10 | 100,000 | | 100,000 |
| Team | 10 | 100,000 | | 100,000 |
| Initial ERC-20 Tokens | 5 | 50,000 | 50,000 | |
| Staking Pool | 10 | 100,000 | | 100,000 |
| Total | 100 | 1,000,000 | 550,000 | 450,000 |

3.2 HyperSonic Utility

Here's how we intend to create utility for HyperSonic through these key strategies:

- **HyperSonic B2C Products Utility**

HyperSonic is part of the Supersonic Ecosystem core products. As our secondary token, HyperSonic serves the purpose of funneling investors into Supersonic through its low supply quantity, auto replenishing liquidity pool and hyper marketing campaigns.

- Up to 3% of HyperSonic is set aside for SSN rewards to HyperSonic Holders
- Users can transact in HyperSonic across the BSC and Ethereum Network

All products within the ecosystem serve a B2B and B2C use case, however some lean towards one of both target audiences, such as HyperSonic.

3.3 HyperSonic Burn

SSN is the key asset in ensuring the growth of the Supersonic Ecosystem and HyperSonic plays a major role in meeting our growth targets. Just as regular startups focus on the growth of their equity capital, for us and most DeFi projects, growing the value of our HyperSonic token in market cap is paramount.

We are always working to create new sustainable burn events to boost HyperSonic scarcity and balance out oversupply.

4. Supersonic Future

4.1 Products Roadmap

Our focus for Q4 '21 - Q2 '22 are:

- Launching and scaling SaleX
- Launching our Secondary Token HyperSonic
- Securing Venture Capital Funding for 2022 Product Development

| Supersonic Product/Service | Details | Timeframe |
|----------------------------|---------------------------------|-----------|
| SaleX | Frontend Design and Development | Q4 2021 |
| SaleX | Backend Develop Begins | Q4 2021 |
| Hypersonic | Ethereum Bridge Completion | Q4 2021 |
| Hypersonic | Token Launch | Q4 2021 |
| SaleX | Beta Launch | Q4 2021 |
| SaleX | Launchpad Public Release | Q4 2021 |
| SaleX | Educational Videos | Q4 2021 |
| SwapX | Frontend Design & Development | Q1 2022 |

4.2 Budget

Q4 2021 Supersonic Ecosystem Development and Marketing needs:

| Budget for Q4 '21 - Q1 '22 | Type | USD |
|----------------------------|-----------|----------------|
| SaleX Development | Technical | 80,000 |
| SaleX User Acquisition | Marketing | 50,000 |
| Hypersonic Auditing | Technical | 20,000 |
| Hypersonic Listing | Technical | 200,000 |
| Market Making | Technical | 30,000 |
| Ecosystem Development | Marketing | 50,000 |
| SwapX Development | Technical | 100,000 |
| Total | | 530,000 |

HyperSonic Token Lock-up Schedule

| Allocation | Hypersonic wallet | Q4 '21 Budget | 6 Months Locked | 1 Year Locked | 2 Year Locked | 3 Year Locked |
|---------------------|-------------------|---------------|-----------------|---------------|---------------|---------------|
| Marketing | 100,000 | 25,000 | 25,000 | 25,000 | 12,500 | 12,500 |
| Team | 100,000 | 25,000 | 25,000 | 25,000 | 25,000 | 12,500 |
| Equity Investors | 100,000 | 25,000 | 25,000 | 25,000 | 25,000 | 12,500 |
| Partners & Advisors | 50,000 | 12,500 | 12,500 | 12,500 | 12,500 | 6,250 |
| Staking Pool | 100,000 | 100,000 | 100,000 | - | - | - |
| | 450,000 | 187,500 | 187,500 | 87,500 | 87,500 | 43,750 |

Conclusion

Supernomics is a fundamental document that serves the purpose of a traditional whitepaper and a publicly available audit of our financials, it describes our growth roadmap and sets rules for how SSN is circulated.
